

LIFEMUSIC!

PUTS THE HUM INTO HUMAN!

Music is all around us and ‘**LIFEMUSIC**’ provides participants with opportunities to be truly creative and to express themselves with a sense of freedom...

Chris, the ‘Lifemusic’ facilitator has over 80 diverse musical instruments and combined with the human voice the resulting sounds are

breathhtaking !

STOP PRESS ! Chris, has recently acquired a ‘**Soundbeam**’, an amazing and unique musical ‘keyboard in space’ which uses motion sensors and switches to translate body movement into music and sound. Through participant’s fingertips to whole body dance, their movements can shape and control virtual orchestras, rock groups, circuses, rainforests and underwater worlds . This is a new exciting development to Chris’s ‘Lifemusic’ experience !!!
